2. What are the risks and what could I get in return?

Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product until the settlement date. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to end your product early. You may have to pay significant extra costs to end your product early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. All OTC derivatives are required by law to be classified as 7 out of 7. OTC derivatives are documented under a master agreement and they carry the counterparty credit risk of J.P. Morgan. Any deterioration in the creditworthiness J.P. Morgan could result in a reduction in the value of this product.

You could exchange currencies at a rate worse than the prevailing market rate. Your maximum loss could be unlimited.

This product does not include any protection from future market performance so you could incur significant losses.

If J.P. Morgan is not able to pay you what is owed, you could incur significant losses.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed.

Performance Scenarios **What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

3. What happens if J.P. Morgan SE is unable to pay out?

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

This is not a product which can be sold or transferred. This product can only be terminated on the date(s) agreed with J.P. Morgan. Ordinarily, you have no legal right to terminate or transfer the product prior to the **settlement date**. Early unwinding of the product may occur at the sole discretion of J.P. Morgan,

and only when J.P. Morgan determines it is in a position to unwind the product early. If you and J.P. Morgan agree for the product to be unwound, it will be unwound at the market value at the time of unwinding and additional early unwind costs may apply. Should the product be unwound, you will no longer have a product in place to provide you with the return described above and you may end up with a substantial amount being due from you to J.P.
